Tuesday 7th February 2017

Dear Parents/Carers

**Building works**

I am very pleased to announce that building works are due to start next week, we will be preparing by moving the upper school out of their current classrooms this Friday to enable them to be fully functional in their new classrooms for next Monday morning.

The building contractors Dawnus Construction will be working on site from Monday 13th February, the first two weeks will see the preparation work begin on the upper school block including securing the site and scaffolding, followed by the demolition to commence after half term.

Both the school and Dawnus will be taking health and safety of the site very seriously by putting in place all relevant and necessary safety precautions, during phase one of the build the upper school block will be completely out of bounds to pupils and staff.

I shall be talking to the children during assembly to explain the importance of keeping well away from the safety fencing surrounding the site.

Over the next few months whilst the build is in progress there will be additional security measures in place around the school site, to ensure the health and safety of children, staff and visitors throughout the school day and out of hours.

The main school gate will remain closed throughout the day, however the contractors' vehicles will have access onto the site, can I request that you take extra care walking to and from school as the school site will be much busier than usual and to be particularly careful of moving traffic.

Yours sincerely

Gill Richardson
